MY MERMAID MISSION: *to inspire others to follow their hearts, live out their dreams and make the world a better place by educating and spreading awareness as to how we can take care of our oceans and sea life.*

Dana Mermaid swims with sea life in oceans all over the world including Hawaii, Tahiti, New Zealand and the Bahamas. Dana also helps with humpback whale research in the winter time, and can free dive to 90 feet without mask on a single breath of air. "I swim with dolphins here in Hawaii daily and have a bond with several of the pods here. They have names based on markings and scars to tell them apart. Being a marine mammal naturalist, boat captain, underwater photographer and professional MERMAID, my heart has always been with the sea and I encourage others to listen to their hearts and live their dreams to make a difference for the better in the world! ALOHA."

She resides in Kona, HI and spends her time free diving with the dolphins and other marine mammals. Dana strives to learn as much as possible about these underwater mammals in order to protect them and their ocean home. By following her heart she is living her dream in Hawaii, and is now able to educate and inspire others through her true passion — *Mermaiding*.
